***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14,16-68,103-114,116-137,176 and 178, drawn to a method and apparatus that compares a first and second reading from metal islands that have bound an analyte of interest, classified in class 436, subclass 164.
- II. Claims 182-208, drawn to a method of measuring optical absorbance, classified in class 436, subclass 166.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method and apparatus that requires making a first and second optical measurements. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Newly submitted claims 182-208 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: See the above restriction requirement

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for

prosecution on the merits. Accordingly, claims 182-208 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-29, 32-66, 103-128, 131-137, 176 and 178 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schalkhammer et al. or Aussenegg et al.

See the appropriate paragraph of the 6/18/04 Office action.

***Response to Arguments***

Applicant's arguments filed 11/8/04 have been fully considered but they are not persuasive.

Applicants' remarks and 1.31 Declaration was sufficient to demonstrate Kalyuzhny et al. is not available as prior art and this rejection has been vacated.

Applicants' argue Schlkhammer et al. does not require an optically active molecule. These remarks are not commensurate in scope with the claims that do not exclude additional molecules.

Applicants' traverse Aussenegg et al. on the basis the light radiation is transmitted and reflected through the device whereas the instant invention is directed only to transmission. Again these remarks are not commensurate in scope with the claims that do not exclude additional means, such as the taught mirrored layer that reflects the transmitted radiation.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
